Reduced
heat buildup

meldCX Smart Boards range:

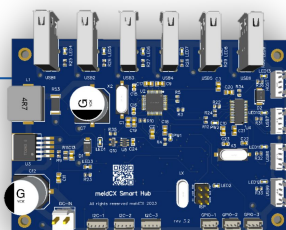

SMART POWER

Supply multiple controlled
output voltages

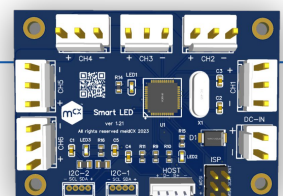

SMART HUB

Connect to and control
multiple peripheral devices

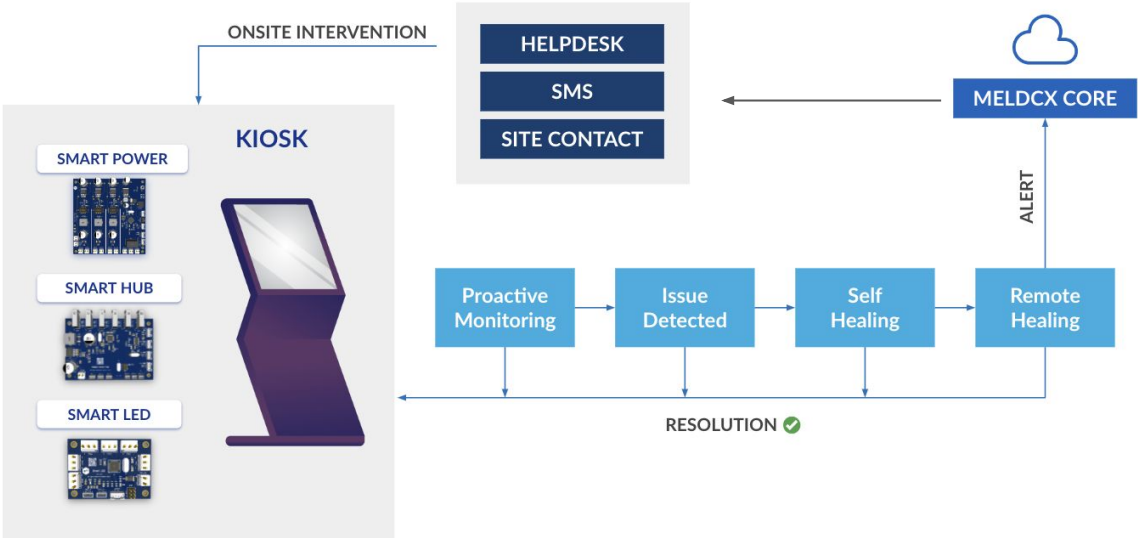

SMART LED

Control multiple channels of
digital LEDs

Centralized management gives you complete control of your kiosks.

Why meldCX Smart Boards?

PROACTIVE MONITORING

Monitor apps, firmware, power, temperature, security, and more – detecting real-time issues without customer intervention or the need to raise a ticket.

AUTOMATED SELF HEALING

Self healing actions built into the smart boards automatically fixes software, network, and power issues, learning from past solutions to ensure minimal downtime.

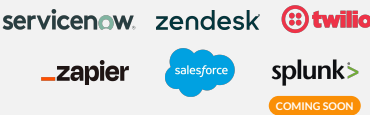

REMOTE HEALING

Alerts can be sent via the meldCX Core Console for a remote technician to attempt remote resolution of the affected device.

MULTI-TEAM ALERTS

Set rules to send specific alerts to relevant stakeholders in a variety of third-party applications. We can integrate with the following platforms:

CONSUMABLES & URGENT ALERTS

Alerts like low paper or other consumables alerts can be sent directly to the site, rather than raising a ticket with the helpdesk. Urgent issues can be sent via text message and a ticket raised simultaneously.

Get real-time insights into device health with our device dashboard.

Smart boards ROI per kiosk:

* Power consumption is estimated based on 24V 3A average over 7 years

** Site visits based on \$250 fee over 7 years

*** Parts replacement based on single part replacement over 7 years

\$294

POWER SAVINGS

over life of the kiosk
at a 40% out of hours
power plan*

\$110

EXTRA POWER SAVINGS

over life of the kiosk at
a 15% on optimized
power plan*

\$1,750

ON-SITE VISIT SAVINGS

over the life of the kiosk
thanks to self healing
and remote recovery**

\$100

INITIAL PURCHASE SAVINGS

of separate power
supplies***

\$1,000

PARTS REPLACEMENT SAVINGS

over the life of the
kiosk***

\$3,254 total savings over the life of a single kiosk.
